

Panthronics

Want to do some *real engineering again?*

Exciting new startup focusing on innovative wireless in Graz
with huge upside potential and big-player engagement is looking for:

Experienced Analog/Mixed-Signal IC Designer (f/m)

For the development of the analog part of ICs for RFID/NFC, Mobiles, Wearables, and IoT-Applications.

Tasks and responsibilities:

- Define design concept; transistor-level design and verification
- Floor planning, pinning, top-level evaluation
- Modeling of analog circuits by means of Verilog or VHDL; Design for testability
- Technical communication with customer; strong interaction with off-site design teams
- Design and Layout reviews; layout-support
- Lab-evaluation and characterization

Profile:

- Degree in the field of electronic engineering
- At least 8 years' experience in analog mixed-signal circuit/system design for RFID readers and/or NFC controllers
- Strong knowledge in analog design flow and development tools such as Cadence ADE
- Fluent in English – German skills are a plus
